Wheat Pool Meeting Was Well Attended

Large Gathering Hear Addresses of Local Delegate and Director Queries Answered

One of the largest Pool meetings ever held in Chinook took place in the school hall last Saturday afternoon and all present were interested in the addresses given by the speakers.

N. D. Stewart, delegate for this district, gave a very interesting account of the annual convention. Mr. Stewart said that he was very glad to see so many present. It went to show that the farmers were interested in their own business. He urged the members to ask any questions they wished, not to hold back.

The speaker said the Wheat Pool was not going under, as so many of our enemies would have us believe, as there were 2,137 new contracts signed during the past year. The Alberta Pool owns 439 elevators, all reported clear at the annual convention.

Mr. McPherson, Director of the pool, in dealing with the pool deficit of 1929 caused by overpayment, said it would all be paid back out of the commission and elevator reserve held by each individual farmer and would be spread over a number of years.

Dealing with the provincial government guaranteeing the banks, he stated that the pool had given the government a letter of security for any advances made by them.

In regard to the options bought by the Wheat Pool, he stated that the pool sold thousands of bushels of wheat to the Canadian mills on options.

The question was then asked as to salaries. The speaker said Mr. MacIvor's salary was \$15,000 per year.

Speaking of Mr. McFarland as general manager of the pool, he said that the eastern banks and the provincial premier favored Mr. McFarland's appointment as general manager. He gets no salary but his living expenses.

Mr. McFarland closed the London office because he had heard that it was causing friction over the United Kingdom.

In reviewing the criticisms regarding the pool losses, he stated he had heard from very good authority that for every dollar the pool lost the trade lost two. He had heard of lots of criticism regarding the leaks in the pool, but he was sure there were no such leaks in the pool as there were in any other organization half as large as the pool.

The question was asked as to why the annual convention was held in the Palliser Hotel. He stated that it was the cheapest place. Calgary's rate of rental for a hall was \$10 per day.

Mr. McPherson answered several questions to the satisfaction of everyone.

The following resolution was presented at the meeting but lost: Resolution as presented at the Cereal Pool meeting Jan. 8, 1931.

"Whereas, it would appear that the operations of the Pool have not been conducted satisfactorily to the members, and

"Whereas it would appear that a change in the management through introducing new blood into the directorate would benefit the organization;

"That the by-laws be so amended that at least two new directors shall be elected to the board each year:

"Provided (1) No retiring di-

Annual School Meeting

The annual meeting of the Chinook Consolidated School Board was held last Saturday afternoon and was one of the best attended board meetings ever held in the Chinook school. C. W. Rideout, chairman, called the meeting to order at about one o'clock, and the minutes of last annual meeting were read and adopted. The reports of the teachers, the trustees, the secretary-treasurer, the auditor and the inspector were then read. These reports were discussed and adopted.

The principal's report, as given by W. S. Korek, consisted of the following: Total enrolment for the year 131. School in operation 200 days. Distribution of pupils according to districts: Bison 65, Popular 22, Buffalo Plains 21, Crocus 15, Carpathia 8. The average daily attendance for the term was 1198. Average daily attendance per teacher was 30.2. Average attendance of pupils above Grade VIII was 28.9. Instruction is being given in the school to all pupils from Grades I to XI, both grades inclusive.

At 2 o'clock the chairman called for nominations for trustees for Bison, Crocus and Carpathia S. D.

H. O. Hille was the only nominee for Carpathia S. D. and Neil McLean for Crocus S. D.

In the selection of a trustee to fill the vacancy in Bison S. D. caused by the resignation of C. W. Rideout, three ratepayers were nominated, Lloyd Robinson, Wm. Milligan and W. S. Lee. Messrs. Lee and Milligan refused to accept the nomination. The chairman then declared Mr. Robinson elected as trustee to fill the unexpired term of Mr. Rideout.

A motion was made by Messrs. Westphal and Ous, "That this meeting go on record as being opposed to a dance after the Christmas entertainment in future, and that they approve of the action of the board in not wishing to have a dance after the last entertainment."

An amendment was made by Messrs. Dressel and McDonald "That this matter be left to the discretion of the board." Amendment carried.

A vote of thanks was extended to Mr. Rideout for his services as Trustee and as Chairman of the Board.

Chinook Holds Beaver Cup

Two Chinook rinks challenged Youngstown for the Beaver Cup last Thursday night at Youngstown, and resulted in a win for Chinook with a margin of six points.

On Monday night two rinks from Youngstown came up to Chinook to try and recover the cup, but the home rinks added a little larger margin of nine points.

The personnel of the two rinks which won against their opponents in both games, are as follows: Hurley, Todd, Chapman, Milligan, skip.

Smith, Peterson, Morrison, Butts, skip.

Oven has challenged Chinook for the cup, game to be played here Saturday night at 8 o'clock.

O. L. Mielke was a week end visitor at Calgary, returning Tuesday morning.

rector to be eligible for re election for at least two years.

The Ladies' Aid met on Wednesday, Jan. 14, at the church. There were nine members present. The usual routine business was conducted. The schedule for meeting places for the ensuing year was made out. The remainder of the afternoon and evening was spent in quilting. Mrs. Jas. Rennie served a dainty lunch after the afternoon meeting. Next meeting will be held at the home of Mrs. Shand.

Sibbald Couple Celebrate Their Golden Wedding

An enjoyable evening was spent on Saturday, December 27, at the Sibbald church, when nearly 100 friends and relatives gathered to celebrate with Mr. and Mrs. Edward Bray their golden wedding. Mr. Bray came to Coburg, Ont., from London in 1857 in a sailing vessel, later moving to Muskoka, Ont., where he met his wife, who was a Scotch lassie, and where they were married. They came to Sibbald in 1910 with their nine children. They have living three daughters and two sons: Mrs. Othen of Benton, Alta., Mrs. Agner of Throne, Alta., and Annie of Sibbald, Richard of Salmon Arm, B.C., and Charles, Professor of Agriculture in the Louisiana State College. There are also 13 grandchildren.

The Rev. A. Kelmo was chairman, and Mrs. H. Hunter and Mrs. A. Caswell were hostesses for the evening. The programme included a number of Scotch songs and addresses by H. L. Patterson, F. Strong, Wm. Linklater and Mrs. T. Stevens, president of the Ladies' Aid.

Presentations Made Little Evelyn Speer, in Scotch costume, presented Mrs. Bray with a bouquet of flowers, after which the bride and groom of fifty years ago, attended by Mrs. Scott and Mr. E. Green, led the guests in the wedding march, played by Mrs. Gallagher. Mr. A. Caswell presented Mr. and Mrs. Bray with a purse containing \$50 in gold, to which Mr. Bray gave a very pleasing reply.

After refreshments were served, a beautifully decorated wedding cake, donated by Mrs. John Young, was presented by Mrs. Scott.

Collholme Collections

The annual meeting of the ratepayers of the Collholme School District was held last Monday in the school. W. W. Wilson, who was the retiring trustee, had his vacancy filled by N. D. Stewart. The board now stands as follows: N. D. Stewart, N. D. Morrison and E. E. Roberts, the latter two being chairman and secretary respectively.

Next Sunday, January 18, service at the Collholme church will be held under the auspices of the local W.M.S. at 2.30 p.m. instead of 11 a.m. A good program is being arranged.

A number of citizens from Collholme attended the International Tractor School held last Monday at Cereal.

The weather is still holding clear and cold, and as yet there is no snow. This makes an ideal winter for livestock, as well as for the running of cars.

Brown & Wilson recently butchered a large beef. Anyone wishing to buy beef should inquire of them.

The Women's Missionary Society met and held their monthly meeting at the home of Mrs. W. W. Wilson last Thursday.

Mr. and Mrs. John McGaughey, who moved to Calgary some years ago, are again in the district renewing old acquaintances.

Hon. R. McPherson, one of the directors for the Alberta Wheat Pool, addressed a meeting in Chinook last Saturday.

Mr. and Mrs. W. M. Crockett, of Youngstown, visited at the home of Mrs. M. C. Nicholson last Thursday.

A Turnover Tax

Financial journals throughout Canada are discussing probable ways and means whereby the Dominion Government will raise the revenues required to carry on all the services and administrative responsibilities of the Federal Government, meet the charges on the public debt, and balance the national budget. The same question is receiving the close attention of the Prime Minister and his cabinet, and before long will demand consideration by Parliament and the people generally.

It is admitted in all quarters that the Dominion will face a deficit in the operations of government for the year 1930-31; that, instead of the national debt being reduced, it will be increased. In view of this situation, steps must be taken to devise new sources of revenue because no reductions in expenditure that could possibly be made would, in themselves, be sufficient to offset the decline in revenues which has taken place, and which it is forecasted will continue this year.

This is not a party question; it is a national problem to be faced and solved. Canada is not alone in having to face such a condition; other nations are in exactly the same box.

It is estimated that the Dominion's deficit this year will be in the neighborhood of \$75,000,000. There have been heavy declines in Customs duties, sales tax receipts, excise tax. The income tax yielded a slight increase, but it was payable on 1929 incomes, which were generally greater than in 1930, so that a drop in this source of revenue next year must be anticipated. Furthermore, inasmuch as it is the Government's policy, approved by the people in the last general election, to cut off some hundreds of millions of imports it follows that Customs duties will show a still greater drop this year.

On the expenditure side of the national ledger increases rather than decreases must be looked for. The unemployment relief bill of \$20,000,000 has to be met; Old Age Pensions to be borne solely by the Dominion rather than fifty-fifty with the Provinces, and which will be made effective in all Provinces, means an expenditure of another \$20,000,000 or more; the completion of the Trans-Canada Highway will be an expensive undertaking. So more money must be found, and a fairly large sum at that. In view of the fact that the Sales Tax has been reduced to a mere one per cent; that Income Tax returns will be smaller; that Customs duties will take a drop as a result of decreased imports and cannot be depended upon in future to yield the major portion of the national revenue, it is being suggested in Eastern Canada that both the Sales Tax and the Income Tax be abolished in their entirety, and that a new tax, a tax on turnover, be created.

This proposal is deserving of study and should be the subject of discussion by all the people, because it is a tax that will be paid by every body. It has the merit that no one will be able to escape from it. The other question is, will it be equitable to all in relation to the ability of each and all to pay.

A turnover tax means a tax on every business transaction that takes place in Canada. A Customs tax applies only to articles imported into Canada from other countries; an Excise tax is imposed on only a number of specified articles, intoxicating liquors, tobacco, matches, bank cheques, etc. The Sales tax is levied on a limited number of transactions. But a turnover tax would mean the levy of the tax on each individual transaction, whether it be on the raw materials sold to the manufacturer, on the manufactured article sold the jobber or wholesaler, on the same article again when sold by the wholesaler or jobber to the retailer, and again when sold by the retailer to the ultimate consumer. It would mean a tax on railway tickets, telegrams, telephones; it is a tax which hotels and restaurants would have to levy; you would pay it to the barber, to the taxi driver, to the newspaper publisher, to the theatre, and so on all along the line every time an article was sold by some person and purchased by another.

The annual turnover of business in Canada amounts to many billions of dollars,—just how large the amount is it is difficult to even estimate. Even a very small tax, a trifling tax, one per cent, one-half of one per cent, one-quarter of one per cent, would yield an enormous revenue. But where an article passes through many hands or avenues of trade before it reaches the final consumer, even a small tax on each turnover might mean a fairly heavy charge in the end.

Possibly certain exemptions would be provided, but the moment exemptions are provided possibilities for evasion of the tax arise; also the danger of discrimination in favor of one class of people, business or industry. The whole subject is intensely interesting, and, as, stated, deserving of close study and full discussion.

A New Style Restaurant

Mechanized System Is Planned By New York Man

Soon a diner will be able to sit down, press a button and his food automatically will appear, according to an invention made public by H. Russell Brand, New York.

Brand soon will open a restaurant where food will be cooked without cooks, will be served without waiters, dishes will be taken away without boys, and will be washed without kitchen help. He hopes eventually to complete a chain of restaurants throughout the country with his mechanized system in use.

Some clouds are ten miles thick.

Importance Of Seed

Buyers Of Inspected Seed Assured Of High Quality

The growing importance of seed production as an industry in Canada is shown by the recent shipment from Stuartburn, Manitoba, to the United States of two carloads of Yellow Multiplier onion seed. The inspection tag and seal of the Dominion Seed Branch is the best possible assurance of purity, careful selection and high quality.

After all, the most enjoyable way to follow a vegetable diet is to let the cow eat and take yours in the form of sirloin steak.

Smothering and Painful Spells

Everything Would Turn Black

Mrs. Andrew Black, Harcourt, N.B., writes: "I had been troubled with smothering and fainting spells and everything in front of me would turn black, and I would fall down in a faint and be unconscious for several minutes. I did not know what to do, until one day I was reading where Milburn's Heart and Nerve Pills had helped so many people and boxes and found they help me wonderfully."

Price 50c a box

Sold at all drug and general stores, or mailed direct on receipt of price by The Milburn Co., Ltd., Toronto, Ont.

Was Noted Scientist

Dr. Henry Ami, Canadian Archaeologist, Dies In France

Dr. Henry Ami, one of Canada's outstanding scientists, died recently at Mentone, France, according to news received at his Ottawa home. An archaeologist and paleontologist of international reputation, Dr. Ami startled the world of science a few years ago by his discovery of evidence tending to show that the Eskimo races, now found exclusively in the Canadian Arctic, at one time lived in France.

In recent years, Dr. Ami divided his time between France and Canada. He was the founder and leader of the Canadian School of Prehistoric History in France, through which he made the archaeological excavations at Dordonne, upon which he based his theory of the early life of the Eskimos.

Dr. Ami is survived by his widow, three grandchildren, Nicholas H. Slater, Clara and Jeanne-Anne Slater, of Toronto, and a brother William Ami, of the University of Manitoba, Winnipeg.

Woman's Fortitude

Forces Herself To Smile Through Pain

"I never seem to find time to rest," says many an overworked housewife. Under smiles and forced cheerfulness she conceals weariness and nervous depression; headaches and backaches. Often she is in real pain, but still refuses to give up. This very fortitude is apt to be her undoing. If she continues to neglect the signals of distress she will sooner or later suffer a serious breakdown.

A noted doctor has stated that nine-tenths of the ills of womanhood are due to poor blood. That anemia is the cause of the low spirits, the poor appetite and palpitation that make life a burden for so many. There is no need, however, for women to suffer in this way. All the miseries of anemia can be banished by taking Dr. Williams' Pink Pills. These Pills create an abundance of new, rich, red blood, and this new blood will bring strength and vitality to nervous, overworked women. The Pills are sold by all medicine dealers or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Excavations In Mesopotamia

Interesting Discoveries Reported Of Traces Of Ancient Civilization

Excavation in Ur of the Chaldees in Mesopotamia, have uncovered proof of the existence of buildings and a civilization there prior to the flood described in the Bible. It was announced in London, England.

The announcement was made by officials of the joint expedition of the University of Pennsylvania and the British Museum, headed by C. L. Woolley.

The excavations into the ruins of Ur, it was declared, proved the existence of a civilization in the land which the flood actually covered.

The scientists also discovered interesting tombs of great kings of the third dynasty, about 2400 to 2300 B.C., the report disclosed.

Just Right For Upset Stomach

For after-eating distress, gas, sourness and bloating, the quick and positive neutralizing action of Bisulphate Magnesium has proved to be just right! Relief, certain and gratifying, almost instantly follows the very first dose—and a few cents worth obtainable from any good druggist, lasts for a long time.

A brickmaker turns out by hand about 55 bricks an hour, whereas a brickmaking machine operated by one man turns out 40,000 bricks in the same time.

Praises This Asthma Remedy. A grateful user of Dr. J. D. Kellogg's Asthma Remedy finds it the only remedy that will give relief, though for thirteen years he had sought other help. Years of needless suffering may be prevented by using this wonderful remedy at the first warning of trouble. Its use is simple, its cost is slight, and it can be purchased almost anywhere.

Will Visit Buenos Aires
 The Canadian delegation to the British Empire trade fair being held in Buenos Aires next spring, will reach the Argentinean city in time for the inauguration of the exhibition by the Prince of Wales, March 14. This was announced at Montreal by Angus McLean, president of the Canadian Chamber of Commerce, which is organizing the Canadian party.

Servant (announcing new arrival at the party): "Mr. Tootle."
 Mr. Tootle (in undertone): "And Mrs. Tootle."
 Servant: "And Mrs. Tootle, too."

Cavalry Honors

Units Of Canadian Cavalry Brigade Awarded Battle Honors

Units of the Canadian cavalry brigade are awarded their battle honors in a list published by the Department of National Defence here Saturday. The Royal Canadian Dragoon, a regiment of the permanent force, and the Fort Garry Horse, are included in the distribution, which differs somewhat from that of the infantry battalions of the Canadian corps. Up to the end of 1915 the Canadian cavalry regiments served as "corps troops," taking their turn in the trenches along with the infantry; but only in 1916 they were withdrawn and transferred to one of the British cavalry divisions.

The honors include "Bazentin," 1916; "Pozières," 1916; "Cambria," 1917; "St. Quentin," 1918, and "Beauveroit," 1918.

Other units whose battle honors are announced are:

The Manitoba Mounted Rifles, the 1st Cavalry Machine Gun Squadron, and the machine gun squadron of the Canadian Cavalry Brigade, of Winnipeg, Man., the Manitoba Rifles, of Portage la Prairie, Man.; the 14th Canadian Light Horse, of Shaunavon, Sask.; the Seaforth Highlanders of Canada, which perpetuates the 72nd Canadian Infantry Battalion.

Find Ancient Tomb

King and Queen Who Ruled In Ireland 2,000 Years Ago

The remains of a king and queen, believed by experts to have reigned from 1,800 to 2,000 years ago, have been found on Scedee, a mountain near Carrick-on-Shannon, Ireland, says the Sunday Times.

The skeletons, lying side by side, were discovered in a vault the entrance of which was barred by a solid block of dressed masonry weighing from 10 to 15 tons. Their heads were facing the former royal seat of Tara, where Irish kings were supposed crowned in pagan days. Historians believed they are members of a dynasty whose origin has been lost in the mists of antiquity.

Further exploration is being carried out as treasure and armor are believed concealed in another chamber in the interior of the mountain. The ruins are being guarded night and day by civic guards.

Miller's Worm Powders attack worms in the stomach and intestine at once, and no worm can come in contact with them and live. They cause the unhealthy conditions in the digestive organs that invite and encourage worms, setting up reactions that are most beneficial to the growth of the child. They have at tested their power in hundreds of cases and at all times are thoroughly trustworthy.

Resourceful Carpenters

Men In Florida Insured Against Starvation Anyway

When work fell off, late in the past summer, leaving 130 members of the carpenters' union at Lake Worth, Florida, facing a jobless winter, they leased a 50-acre farm, and those without jobs began working on it at farm laborers' pay. This created more building jobs for the remaining carpenters by decreasing the number seeking employment. Today the farm has 20,000 cabbages, 30,000 egg plants, and large patches of potatoes and beans coming along nicely. "We won't starve, anyway," says Ralph Osborn, president of the union. "If we can't sell our stuff at a profit, we'll eat it."

Great Lakes Herring Catch

The herring catch at the head of the Lakes this fall is estimated at around 2,500,000 pounds. Some of the fish will find their way to the west coast and some to the east coast while orders have also been received from the United States. Between 300 and 400 men have been employed in this industry during the season.

Alberta Turkey Goes To Jamaica

Mrs. W. A. Freeman of Ardenode, Alberta, has filed an order from a turkey breeder in Jamaica for one male turkey. This follows a similar order placed last year which has been eminently successful. Mrs. Freeman is the leading turkey raiser in Alberta.

The Oil For the Athlete.—In rubbing down, the athlete will find Dr. Thomas' Electric Oil an excellent article. It renders the muscles and sinews pliable, takes the soreness out of them and strengthens them for strain and may be put upon them. It stands pre-eminent for this purpose, and athletes who for years have been using it can testify to its value as a lubricant.

Millions of fish were destroyed by drought last summer in at least 19 states.

W. N. U. 1872

WINTER SKIN TROUBLES

For chapped hands, cold sores, chilblains, frost bite and all the skin troubles due to cold weather, Zambuk will be found particularly effective.

Mr. F. W. Ashton, 1318 Lansdowne Ave., Toronto, says:—"I willingly testify to the splendid healing qualities of Zambuk. I was troubled with Nasal Catarrh during the winter and this was aggravated by frost bite which gave much pain and inflammation, but Zambuk worked wonders and ended the trouble."

Zambuk works wonders also for Colds in the Head if heated and inhaled up the nostrils.

Sample Free and post paid on application to Zambuk Co., 518 Dupont St., Toronto.

Unnecessary Noise

Is Not Conducive To Good Health, Says McGill Professor

Life is too loud these days, and this unnecessary clamor is not conducive to good health or good hearing, Professor H. E. Reilly of the Physics Department of McGill University told the Montreal Kiwanis Club recently.

Enemies of noise have collected some interesting data in a recent survey and have come to the following conclusions, he said:

1. That a policeman blows his whistle 10,000,000 times louder than necessary.
2. That the blast of a steamboat siren is 100,000,000 times louder than necessary.
3. That an automobile horn is sounded 50,000 times louder than is necessary, and on a clear day can be heard ten miles away.
4. That dogs bark too loudly.
5. That boys shout too loudly.
6. That the milkman, the groceryman, the baker, and the butcher's boy all ring the doorbell too long.

An "electric inspector" which detects flaws in bottles has been invented.

Fruit growers of the Irish Free State want co-operative marketing.

Future Of Television

Will Be Commercial Proposition Within Five Years

Television will be a commercial proposition within five years in the opinion of Major-General J. G. Harbord, chairman of the Radio Corporation of America, who was a New Year's guest of Col. Hanford McNider, United States minister to Canada.

Mr. Harbord could see many advantages in government-owned and operated broadcasting, but he believed Canada would be served better if control of radio were left to private venture.

Street signs in Japan have been lettered in both English and Japanese.

Submarine Grain Carriers For Future Is Visioned By Sir Hubert Wilkins, Explorer

Giant submarines, carrying the grain of the prairie provinces across Hudson Bay, under the ice of Hudson Strait and across the Atlantic some day will keep Churchill, Canada's sub-Arctic port, open all year round, Sir George Hubert Wilkins, noted British explorer, believes.

"I think large submersible grain carriers, of say 15,000 tons displacement, are the only thing that Hudson Strait route is to be used properly," Sir Hubert told the Canadian Press.

Sir Hubert, who has flown over the Arctic ice and walked on it, expects to prove next summer that it is far easier to go under it.

In his 170-foot submarine, "Nautilus," named after the craft in Jules Verne's "Twenty Thousand Leagues Under the Sea," he will attempt to travel 2,100 miles under the ice, from Spitzbergen to the Behring Sea. The "Nautilus" is now outfitting at Philadelphia, Pa.

She has been remodelled from an old naval type into what will be the summer home of 18 men, six scientists and a crew of 12.

While he has in mind primarily the acquisition of oceanographic and meteorological data, which among other things, will help weather forecasters, Sir Hubert believes the voyage will be valuable also as a demonstration that submarine operation under ice is really practicable. A new scheme of storing air sufficient for two and a half days, he believes, will enable him to show that submersible craft may be navigated for hundreds of miles without being brought to the surface.

"Of course," he said, "I don't expect to see submarines carrying cargo at once, but I do believe that eventually submersibles will be necessary if Canada is to get the most out of Churchill.

"With submersibles," the explorer continued, "it would be possible to operate all year around, while three or four months a year is the most that can be expected of surface craft. In addition to this, the operation of submarines would be cheaper because they would not require ice-breakers to keep channels open for them," he declared.

Sir Hubert remarks that the Dominion government, in building the Hudson Bay Railway had expected a saving of one-and-a-half to two cents a bushel in the shipping cost of grain to European ports. He thought that the eventual placing of submersible grain carriers on the northern route would bring about a slightly greater reduction in the per bushel rate besides offering a total saving in shipping cost three or four times greater than would be possible were Churchill kept open for only a few months each season.

King's Speech Preserved

Record Made Of Address At Opening Of Indian Conference

A gramophone record of the speech which the King made at the opening of the Indian Conference in the Royal Gallery of the House of Lords has been sent to Buckingham Palace in a special green leather case. The copper matrix of the King's speech has been sent to the British Museum to be filed away in the interesting collection of famous voices which are being preserved for posterity. In the Museum archives there are many of these voices which will be able to be heard in a thousand years time as well as they are today. Two of the earliest—and they are phonograph records—are of Lord Tennyson, the Poet Laureate, and Mr. Gladstone, who made a speech for the Edison Phonograph Company in 1890.

Mexico is to have a new coast-to-coast auto highway.

"Your husband dead only a fortnight, and you want to marry again?"
"Yes, mother, but next time I will wait longer."—Buen Humor, Madrid.

W. N. U. 1872

Origin Of The Halo

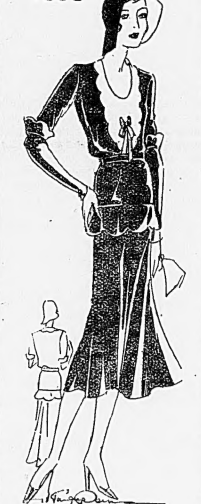

Were Once Wooden Discs To Protect Images From Rain

Have you ever stopped to ask why halos or circles of light are painted about the heads of the saints in religious art? The origin of this customary attribute of holy characters is simple and interesting. In the eleventh century, when cathedrals and churches had a great impetus, images of the saints grew more and more numerous, and it was customary to place these images outside the cathedrals, under the eaves, as well as inside the edifices. In time these images became discolored from the rain, and so some ingenious person thought of a way to protect them. Wooden discs were placed over their heads to protect them from the drippings of the rain. Giotto, the famous Italian painter, began painting these wooden discs or coverings into his pictures, thinking in his country-bred ignorance, that they were inseparable from the saints themselves, but his artistic sense rebelled against the ugliness and uncouthness of such a wooden platter, so he began to idealize it. At first he represented it as a dark circle, but by degrees made it luminous. Thus the halo as we know it today, the symbol of holiness in sacred art, came into being, it is reported.

(By Eva A. Tingey.)

BACK TO BIBS

All Tingey models are created and sketched in Paris and the patterns are made in New York.

Not childishly but in a most sophisticated manner we have back to bibs. They are often part of our very newest frocks.

Today's pattern includes a very charming example. Here on a dress of red anacardine crepe is a cream georgette bib. It is very simple to make, for two flat pieces scalloped on the outer side are simply stitched together along the curves and turned inside out—et voilà! a most professional effect. A ribbon either of the white georgette or red like the frock (picot edged or bound) can be fastened to the bodice and passed through slots as shown. The slightly shaped scalloped pieces so very modishly placed on the hips and above the elbows are double and treated like the bib.

This pattern may be obtained in sizes 14 to 20. It is ready for immediate delivery. It is hand cut.

Send 25 cents (in stamps or coin) to Fashion Bureau. Write carefully and plainly your name and full address, the number of the pattern and the size you want.

Canada's World's Last Great Fur Preserve

Output Has Increased and Supply Equal To Demand

Though the blizzards are gone, and the beaver and marten are slowly following, Canada's fur trade appears to be in no immediate danger of extinction. The state of affairs of a century ago when the value of fur exports exceeded that of any other export has been vastly changed in the Dominion's march of progress. But in that era the output has increased tremendously and government officials at Ottawa say Canada may still be described as the last great fur preserve of the world.

The forward strides made by the fur industry and the accompanying increase in exports might result in the fear that the source of supply is bound for early exhaustion. But fur farming is now furnishing an ever larger supply base to help meet the demands of midday for a new wrap or neckpiece. The retail trade has played its part by popularizing common and even previously despised furs, and by encouraging the use of domestic animal pelts. In this latter category are the rabbit and the pony.

Experiments in the breeding of rabbits for their fur resulted in the production of several valuable kinds. Chief among them is a species whose fur resembles that of the famed Bolivian chinchilla, and which, under the name of chinchilla rabbit is becoming of high intrinsic value to the trade. Pony fur pieces, usually made from the coat of a "wee horse" common to Russia, have a wide market throughout the world.

A Neglected Market

Opportunity To Develop Export Trade In Hog and Pork Products

Some idea of the opportunity for Canadian farmers to develop the export trade in hog and pork products is afforded by figures with respect to dead meat imports into Great Britain as compiled from H.M. Board of Trade Returns. For the first ten months of 1930, bacon imports reached a total of 7,414,620 cwt., valued at \$34,922,963, and of this volume Canada supplied only 87,493 cwt., which had a value of \$433,855. During the same period imports of hams totalled 865,035 cwt., of which the United States supplied 715,332 cwt., or more than ten times the 70,968 cwt., supplied by Canada. Incidentally, these are the only two in a long list of dead meat import items in which Canadian contribution was sufficiently considerable to cite separately.—Department of Agriculture, Ottawa.

Courtesy On the Highway

Good manners and common sense are afforded preventives of highway accidents—perhaps the greatest. Neither is as general as is desirable. Until that blessed day when all motorists are always polite, when no driver takes more than fairly belongs to him, good, stiff traffic regulations, energetic cops and hard-boiled judges in traffic courts will still be found useful.

Jinks—"Old man, you certainly have a wonderful vocabulary."
Blinks—"Yeah, I wish I were single again so I could use it."

FINANCIER AND STATESMAN

A recent portrait study of the late Lord Melchett, formerly Sir Alfred Mond, British financier and statesman, who died Dec. 27, Lord Melchett succumbed to phlebitis and inflammation of the arteries.

Canada's Water Power Supply

Is One Of Leaders Among Countries Of World

With \$1,000,000,000 invested in electric stations, Canada emerges from 1930 as one of the leaders in water power development among the countries of the world.

The estimate of the Department of the Interior places a limit of 43,000,000 horse-power on the electricity that could be generated from all rivers in Canada and 6,000,000 horse-power in turbine installation have already been installed. The majority of this installation has taken place in the last 10 years.

In the face of the problem presented by the high cost of transporting coal over the long distances in this country, particular significance attaches to the fact that electric power development last year was equivalent to one-half of all coal used in Canada. While definite statistics have not yet been compiled an estimate places at 18 billion kilowatt hours the power drawn during 1930 from Canadian streams.

Special Prize Given To Alberta Farmer

Canadian National Railway Award Goes To Grande Prairie Man

By virtue of having won the world's championship for 1930 in timothy seed, Robert Cochran, of Grande Prairie, Alta., has been awarded the special Canadian National Railway cash prize, donated each year at the Chicago International Hay and Grain Show to the Canadian taking top place in that class, it was announced by R. England, manager, agricultural department. Although Cochran has been winning prizes at Chicago and other exhibitions for many years, this is the first time he has taken a world's championship in timothy seed, Mr. England said.

Dredging machinery was carried by airplane from Superior, Mont., to a deserted mining camp in upper Idaho.

YOUNG SONS OF MUSSOLINI

Oddities Of Grain Situation Shown By Suggestions For Disposal Of Surplus Crop

Canada Colonization Association

Encouraging Report Of Work Accomplished Submitted At Annual Meeting

At the annual meeting of the Canada Colonization Association, held at the Royal Alexandra Hotel, Winnipeg, January 5, Colonel J. S. Dennis was re-elected president; P. L. Naismith, of Victoria, vice-president; and the following directors re-elected: D. C. Coleman, Winnipeg; C. T. Jeffery, Minneapolis; C. N. Bowman, Waterloo; James A. Richardson, Winnipeg; J. N. R. MacAlister, Montreal; S. C. Porter, Calgary; Geo. Walker, Calgary, and W. J. Blake Wilson of Vancouver.

The annual report submitted showed a total of 4,107 families settled on 926,934 acres, the total purchase price being \$35,115,202.99; of this number 489 families were colonized on 92,666 acres during 1930. The purchase price being \$1,962,919.00.

"A thorough check-up of families settled by the association since 1925 shows that only 12 per cent. failed," Colonel Dennis stated at the close of the meeting. "Of considerable interest," he continued, "is that only 10 per cent. of the British families placed failed. The marked results with British families is due to careful selection and constant supervision."

All farms and families colonized were personally visited during the summer and fall by the staff of the association and classified under four headings: "A," successful not requiring further supervision; "B," on the road to success, still requiring considerable supervision and "D," failures.

While a large number of the families colonized were from Great Britain, northern and Continental Europe, the settlement services of the Canada Colonization Association, as Mr. E. W. Beatty associated at Saskatoon last fall, have always been available for Canadians of agricultural experience and training, who wish to take up farms and follow agriculture as a permanent vocation.

In the province of Manitoba, 1,152 families are settled on 260,919 acres. "The work of the association covers the provinces of Ontario, Manitoba, Saskatchewan, Alberta and British Columbia and is maintained as a subsidiary of the Canadian Pacific Department of Immigration and Colonization," said Col. Dennis.

T. O. F. Herzer was re-appointed manager and A. E. Lover, secretary-treasurer.

Use Cod Liver Oil

Required To Keep Laying Hens Producing During the Winter Months

An abundant supply of Vitamine "D" is required to keep laying hens producing, and healthy during the long winter months when they are shut in. It is the presence of this vitamine which assists assimilation of the minerals calcium and phosphorus in the production of eggs and egg-shells. As the value of cod liver oil for poultry feeding depends entirely on its vitamine content only reliably tested brands should be used. Crude cod liver oil is suitable for poultry and is not expensive. In the dry mash feed one pint of oil to each one hundred pounds of mash is a good ratio, while with a wet mash or other feed one to two teaspoonfuls to each twelve birds has been found adequate. — Dominion Experimental Farm Note.

Manitoba's New Industry

Eighteen carloads of sugar beets represents the harvest of the first crop of that product reaped in Manitoba. The industrial development board, which is sponsoring this new Manitoba industry, stated that six carloads made up the first shipment to the American beet sugar refinery at East Grand Forks, Minn., and that 12 more carloads followed shortly after from the Selkirk, Lilyfield and Stonewall fields.

Predatory Animals In The North

The measures adopted by the Department of the Interior to encourage the white and native populations of the Northwest Territories to destroy predatory animals continue to bring satisfactory results. During the past fiscal year, the number of wolf pelts on which bounty was paid (at \$30 per wolf, the pelt being turned into the department) was 938.

Nearly 8,000,000 sheep were slaughtered and freezing in New Zealand in 1930.

Oddities of the grain situation in the prairie provinces are numerous, and the many suggestions for the disposal of the surplus crops run the gamut from a \$1,000,000 purchasing plan—as the contribution of a large commercial firm—to a bushel of wheat for admission to hockey matches of a rural league in Alberta.

With the price of wheat slumping from \$1.0 a bushel value of a year ago to the 50-cent level of today, agriculturists in many areas have found substitutes for its use, promising greater monetary reward than ordinary marketing.

The greatest use and the one likely to bring the most valued monetary return, is the finishing of livestock for market. When high values prevailed, agrarians were content to sell "feeder" cattle, which were finished by the buyer. Today they are feeding oats and barley and shipping their cattle and hogs ready for the scales and the stockyards. Thousands and thousands of bushels have been disposed of in this way.

Some prairie districts have abundance of grain, but lack fuel and money to buy it with. They have found a substitute for the coal of Alberta and the products of the forest areas of Manitoba by burning barley—now at the lowest level in history—in the famed Quebec heaters. A bushel a day is the consumption of the heater, and "it makes some fire," is the comment of one user.

The latest suggestion comes from Calgary, where a "grain products relief association" has been established. Contributions of grain will be sought in rural areas, and with the co-operation of millers, it will be ground for the use of the needy of Calgary and district. Already several thousands bushels of wheat and oats have been donated.

Ye old miller has come back to Manitoba communities. Farmers in the prosperous years purchased their flour from the town grocer, now they are having their own grain milled and the little community mill—closed for a decade or more—is in business again.

Another suggestion was the "contribute a bushel of wheat to the starving Chinese," but lacking organization, it remains "just a suggestion," like so many other plans, to relieve the burden of the tiller of the soil.

For Smut Control

Found That Hot Water Treatment Control of Loose Smut

The modified hot water method for the control of loose smut in wheat has been found effective and satisfactory in experimental work conducted at the Indian Head Experimental Farm of the Dominion Department of Agriculture. This method consists of placing the grain in loosely woven sacks and then soaking it in water at 86 degrees Fahrenheit for four hours to soften the seed and prepare it for the action of hot water. The grain is then transferred to water at 112 degrees Fahrenheit for fifteen or twenty minutes and next into water at 129 degrees Fahrenheit for exactly ten minutes. This hot treatment is very important and should be carried out with the greatest care throughout. When the grain is finally removed from the hot water it may be plunged into cold water for a moment and then spread out to dry, care being taken to see that it does not germinate or freeze.

Fish Shipped By Aeroplane

Fish caught in the fresh water lakes of Northern Saskatchewan are now being shipped by aeroplane to markets in Eastern Canada in the United States. About 3,000 pounds of whitefish and trout are carried from the northern lakes to Prince Albert in two daily trips. It is planned to increase the service so that 6,000 pounds can be transported daily to the railroad.

"That man spoiled my marriage."
"Did he make love to your wife?"
"No, he married our cook, and now my wife cooks."—Sondagins-Strick, Stockholm.

At Last! The Truth About PIMPLES

Pimples, acne and blackheads are caused by a rundown, disordered system, by those harmful acids and toxins which make your skin break out. So if you want swiftly to rid yourself of that ugly, blemished complexion and to obtain beautiful, smooth and soft skin for all times—eyes sparkling like diamonds—superb daily health—take Kruschen Salts.

Kruschen Salts are a perfect blend of the six vital salts which nerves, glands, blood and body organs ought to receive from food if they're to work properly—but it's simply impossible to obtain these salts in these days of modern cooking!

Therefore take Kruschen Salts in a glass of hot water every morning before breakfast—this quickly puts back these precious minerals into your system—and drives out harmful acids and toxins, assuring you enviable and glorious youthful beauty and health.

WORLD HAPPENINGS BRIEFLY TOLD

The winter cruise of H.M.C.S. Vancouver started on January 26 to the foreign ports of the Pacific Ocean.

Television will be a commercial proposition within five years, according to Major-General Harbord of the Radio Corporation of America.

Canadian art will be exhibited at the British Empire Trade Exposition at Buenos Aires in March and April, 1931.

Deer have become such a pest in certain parts of New Zealand that plans for their extermination has become a difficult problem, and many remedies have been suggested.

For the first time since it was dedicated in 1753, the Mansion House, home of the Lord Mayor of London, is empty, city officials having moved to a hotel while the building is being modernized.

From the land of the midnight sun in Alaska to the pampas of the Argentine will be the route of the international highway now being projected by governments, good roads associations and automobile clubs of the countries concerned.

The authorized fish catch in Saskatchewan lakes, large and small, approximates 10,000,000 pounds a year, according to estimates of the Department. Approximately 1,400 men were employed in Saskatchewan fisheries last year.

Elk, which roamed in countless thousands over the northwest years ago, and which have since been reduced to a few scattered herds, will be given a chance to multiply again on the wild lands of the Queen Charlotte Islands, far from the hunter's trail.

For the third successive year, Kenora Fire Department has been adjudged the best in Ontario for cities and towns of less than 25,000 population. Judges of the National Fire Prevention Association awarded Kenora first place, Galt second, and Sturgeon Falls, third.

Flowerpot Island

Island In Georgian Bay Turned Over To National Parks Board

Flowerpot Island, in Georgian Bay, has been turned over to the national parks branch of the Department of the Interior. It is situated at the north end of the Bruce Peninsula, and gets its name from two rock formations that resemble huge flowerpots. They have been formed by erosion by the seas, and have trees growing on the top. The parks branch will reinforce the "flowerpots" as their bases are in danger of being eaten away entirely by the action of the waves.

Strange New Ray

Discovery of a ray believed to come from some of the stars in the Milky Way, which pierces eighty inches of leaden plate with a loss of only half its strength, was claimed recently by Professor V. F. Hess, of Vienna. He declares it is ten times as penetrative as the strongest radium ray.

The Loudest Noise

A Montreal scientist says there is too much noise in the world, but fails to point out that the loudest sound of all is that made by the ticking of the clock in a store that does not advertise.

Crows Nest Rates To Churchill

Will Effect a Big Saving To Saskatchewan Farmers

Inauguration of the Crows Nest rates to Churchill on the Hudson Bay Railway will mean an average saving over regular rates of 12.24 cents per bushel on wheat shipped from Saskatchewan, according to calculations made by George H. Smith, freight rates expert of the Saskatchewan Government. Rt. Hon. R. B. Bennett, in his address at Regina, intimated that rates of the Crows Nest rate basis would be effective on the Hudson Bay Railway.

The average rate reduction, according to figures compiled by the department of railways, labor and industries, is 20.4 cents per 100 pounds. The saving from Regina is 20 1/2 cents; from Moose Jaw, 20 cents; from Saskatoon, 21 1/2 cents; from Semans, 20 1/2 cents; from Melville, 19 1/2 cents; from Yorkton, 20 cents; Prince Albert, 19 1/2 cents; North Battleford, 20 cents; Lloydminster, 21 1/2 cents; and Alaska, 21 1/2 cents. This saving is over the mileage grain rates which would otherwise be in force.

Hon. J. A. Merkle, Minister of Railways, Labor and Industries, stated that arrangements have been made by the freight rates branch of his department to carefully compile the schedules of the Crows Nest rates to Churchill from all Saskatchewan points. When this work is completed, the Canadian National Railway will file the freight tariff containing the rates with the railway commission at Ottawa.

That the Crows Nest rates should be applied from all Saskatchewan points on flour, oatmeal, bran shorts and other mill products in order that the movement of these commodities over the Hudson Bay Railway should also receive the benefit of the rates is the opinion of the provincial government. The matter is being taken up.

Saskatchewan Oil Discovery

Another Find Of Oil Reported In The Redfern Valley

Another find of oil is reported in the Redfern Valley on the farm of Thomas Powley. It is found that when pumping water a greasy substance comes up with the water and when separated readily ignites.

This greasy substance comes up through a strata of sandstone and this sandstone when split open reveals samples of forest leaves embedded in the rock. P. Bridger, of Redfern, Sask., opened up some of the sandstone formation and on splitting the rock found the leaves in almost perfect condition. It shows that at some time the whole of the valley must have been a dense forest.

The farmers are of the opinion that gas and oil abounds in huge quantities under the soil formation at least in 500 feet. Mud geysers exist in eight or nine places and seem to be bottomless, continually bubbling with grease and oil.

The Canadian Pacific Railway runs right through the centre of this coal and oil valley from end to end. A government inspector stated that requests have been received to drill in the townsite of Redfern but so far no permission has been granted owing to the compact nature of the village.

The new find of Thomas Powley is just one mile up the valley from the C.P.R. depot and of course would be less hazardous for exploitation.

Swedish Railways Plant Trees

More than 5,000 fruit-bearing trees and bushes were planted last year by the Swedish state railways. Nearly 200,000 such trees have been planted making the government railroad board the largest gardening establishment in Sweden. The trees are tended by railroad employees.

New Building For Grain Show

The general meeting of the Regina Agricultural and Industrial Exhibition authorized the building committee to proceed with the plans for the erection of the new grain exhibition building for the World Grain Exhibition and Conference in 1932.

A mosquito that stores up fat in the summer time, like a bear, and then hibernates in the winter in sheltered spots is found in northern Montana.

Chloroform was discovered in 1831 by Leibig in Germany, and Soubeiran in France, and their reports were published almost simultaneously.

The amethyst and violet tinted glass of the ancients owed its color to manganese.

A rabbit shown in a recent London pet show was valued at \$5,000.

SUNDAY SCHOOL LESSON

JANUARY 18

THE MINISTRY OF JOHN THE BAPTIST

Golden Text: "Bring forth therefore fruits worthy of repentance."—Luke 3:8.

Lesson: Luke 3.
Devotional Reading: Isaiah 40:3-11.

Explanations and Comments

John's Preaching In The Wilderness, verses 1-6.—To John, son of Zacharias, the word of the Lord came (he was made conscious that this was God's plan for him), directing him to go to the Jordan, and preach the baptism of repentance unto the remission of sins; thereby, says Luke, fulfilling the words of Isaiah (Isaiah 40:3-5). John baptized, then, he used a purifying rite in connection with his preaching. It helps to remember the distinction between baptism as practised in the Christian Church, and as practised by John. In the church baptism has come to be regarded as a mediatory rite by sound and by others as an initial and confessional rite. But in the first use of it, by John and Jesus, it was a purifying rite. It was confession, too, but of sin, and the need of cleansing, not, as later, of faith in a person, or a creed, although it did imply acceptance of a man's leadership. To a Hebrew mind it was preaching by symbol as well as by word.—S. D. Gordon.

The Call To Repentance, verses 7-9.—Our poet Lowell speaks of "A kind of maddened John the Baptist. To whom the hardest word comes aptest."

And harsh indeed was John's word to the multitude who came to him to be baptized: "Ye offspring of vipers," was the way in which he addressed them. Vipers and serpents, were considered emblems of deceitfulness and wickedness. John called Pharisees and Sadducees by this term because, knowing their natural deceitfulness and cunning, he detected the sincerity of their motive in coming to him. And he questioned them: "Who thought it worth while to warn you to flee from the Day of Judgment?" The phrase, the wrath to come, recalls the picture of serpents in the fields fleeing before the flames when the stubble is set on fire. The coming of the Messiah was expected to be a day of judgment. Luke 2:23. Since the Pharisees thought themselves so righteous, they should not have feared the judgment; since the Sadducees professed not to believe in it they should not have been disturbed. "Bring forth therefore"—if you would escape the wrath—"Great worthy of repentance," deeds that will prove the sincerity of your repentance. "A new life is the best and most sublime penitence."—Martin Luther.

Fish Farming

New Idea Is Being Promoted In British Columbia

"Fish Farms" are now being promoted in British Columbia. An undertaking is under way to obtain from the Provincial Government a long lease of a small lake which is to be stocked with commercial fish, such as whitefish or lake trout, with a view to providing the general market with fresh fresh-water fish. The fish would be ready three or four years after stocking the lake.

An Automatic Electric Plant

South America's first automatic hydro-electric plant, five miles from Juiz de Fora, Brazil, is reported to be operating successfully. It was opened recently when a Brazilian official closed a switch in an electric substation in Juiz de Fora. Since then turbines have continued to spin although there are no human attendants there.

Letter from firm of easy term furnishers: "We are surprised that that money owing to us has never reached us."

Reply from client: "Do not be surprised. The money has never been dispatched from this end."

Canada's Fisheries

The product of Canada's fisheries in 1929 had a total value of \$53,518,521.

Genuine Gratitude Compels Tribute.

Mr. Victor Hills, of Thornton Heath, writes:—"For many years I have suffered with that distressing complaint—constipation, and its attendant effects of sick-headache and indigestion. It was a red-letter day for me when a friend recommended me a treatment of Carter's Little Liver Pills, and I can honestly say that results have been truly marvelous. I now enjoy good health and feel that life is worth living. The relief I have experienced compels me to add my sincere tribute." Take Carter's Little Liver Pills. All druggists 25¢ and 75¢ red pkg.

MAGIC

MENU

Next time you're entertaining, try this delightful Tea Menu, suggested by Miss McFarlane, Dietitian of St. Michael's Hospital, Toronto.

TEA MENU

Tomatoes stuffed with pineapple
Graham Gems* Nut Cookies
Chase & Sanborn's Tea

Miss McFarlane says: "My successful experience with Magic Baking Powder dates back many years. Consequently, I always use and recommend it because I know it will give dependable baking results. Even a beginner can use it confidently."

Here is Miss McFarlane's Recipe for

*GRAHAM GEMS

1 cup flour	1 cup Graham flour
4 tablespoons brown sugar	1 cup milk
3/4 teaspoon salt	1 egg
4 teaspoons Magic Baking Powder	4 tablespoons butter, melted

Sift together white flour, sugar, salt and baking powder. Add Graham flour, add milk, egg and melted shortening and beat well. Half fill greased muffin tins and bake in hot oven at 425° F. about 20 minutes.

B.C. Granite Quarry

High Quality Of Granite Being Produced At Quarry Near Cranbrook

Members of a small syndicate of Cranbrook men are now developing the granite quarry that lies close to the Canadian Pacific right-of-way four miles west of Cranbrook, B.C. A trial shipment made from this quarry during the summer proved so satisfactory that the recipients are now in the market for more. There are six different grades of the stone, of which the blacks and greens are the most demand; but all take a fine polish and show resemblance to the high grade stone now being imported into Canada from Scandinavia and used for tombstones, table tops, fireplaces, veneer for panelling and for various building purposes.

B.C. Apples For Java

Dehydrated apples shipped by Bulman Limited, to Batavia, Java, have given such satisfaction that another order for three times the original quantity has been booked. The apples are shipped in five pound tins.

Soviet Russia's population has been estimated at 150,000,000.

Another Scientific Discovery

Short Wave Radio Said To Cut Virulence Of Diphtheria Poison

Science has opened a hitherto unknown opportunity for short wave radio—a newly found power to cut the virulence of diphtheria poison. In one sentence this discovery was summarized to the Society of American Bacteriologists by Wacław T. Szymanski and Robert Allan Hicks of Western Pennsylvania hospital, Pittsburgh.

"Highly potent diphtheria toxin," they stated, "is found to be diminished in strength by the action of short electric waves, 1.9 and 3.76 meters, at approximately 150,000 and 80,000 cycles per second."

Diphtheria toxin is the poison which causes the disease and is produced by diphtheria bacteria. The radio waves are the same sort which were announced about a year ago as producing artificial fever in human beings.

England's first census was taken in 1801, when the population was 8,893,000.

The meaner a man tries to be, the less he enjoys it.

New Industry

Manitoba To Manufacture Frames, Comb Foundations and Honey Extractors

As a result of the investigations made by the special committee of the Industrial Development Board of Manitoba into the Manitoba honey situation, Manitoba is to have two new industries. One is the manufacture of frames, which were previously purchased in the east, and the other is the manufacture of comb foundations and honey extractors.

Apparently the first use that map found for manganese was as a source of coloring matter.

U. S. - CANADA AIR ROUTE OPENS ON FEBRUARY 2

Washington, D.C.—Two new international air mail routes, one linking equatorial heat and Arctic cold, the other involving trans-oceanic travel hazards, were being worked out by postal officials.

Assistant Postmaster-General Glover announced the completed schedule for the United States-Canada route to open February 2. This will give a continuous Chicago-to-Winnipeg service, with Milwaukee, La Crosse, Minneapolis, St. Paul, Fargo, Grand Forks and Pembina as the stops.

The St. Paul-to-Winnipeg leg completes an 11,000-mile north-to-south stretch, reaching from the Yukon, where mails have hitherto been carried by dog team, through temperate and torrid zones to temperate again, terminating at Buenos Aires, South America, a three-weeks' air trip.

Mr. Glover said he expected to participate in the ceremonies of opening the route.

Postmaster-General Brown had before him the revised specifications for the European route by way of the Azores. Several weeks ago, bids were called for, but the advertisements were withdrawn because of ambiguity.

The newly-drafted advertisement now only awaits the postmaster-general's approval to be released. Mr. Brown said bids will be opened 60 days after the advertisement appears.

Saskatchewan Legislature

Third Session Of Seventh Legislature Is Formally Opened

Regina, Sask.—The third session of the seventh legislature of Saskatchewan was formally opened Thursday afternoon, January 8, by Sir Frederick W. G. Haultain, official administrator of the province in the absence of Lieutenant-Governor H. W. Newlands.

A salute of 21 guns was fired from the cannon along the lake front, and shortly afterwards Sir Frederick Haultain and his Mounted Police escort arrived at the Parliament Buildings. Heralded by Lt.-Col. A. G. Styles, aide-de-camp to the lieutenant-governor, Sir Frederick entered the chamber at 3:05 p.m., and proceeding to the dais, read out the Speech from the Throne.

The speech from the Throne for the most part consisted of a review of the government's record during the past year, and forecast little new legislation. It was noted that the 1930 power transmission line construction program will be continued. Problems confronting the agricultural industry are to be dealt with during the session, but no intimation was given as to the nature of the legislation to be introduced. Nor was anything said about the proposed highway program.

In connection with public health, the speech announced that an institution to segregate mental defectives from the regular mental hospitals was being planned, and also that the government intended to take constructive measures against the disease strachina.

Shipping Into B.C. Decreased

Vancouver, B.C.—Final figures of deep-sea movement into this port in 1930 are now completed by the Vancouver Merchants' Exchange and show a total of 1,188 arrivals, of 4,474,225 net tons. This is a reduction as compared with the two preceding years. In 1929 the total was 1,285 vessels and 4,606,649 net tons, and in 1928 it was 1,325 vessels and 1,663,002 net tons.

Reduction In Prices

Ottawa, Ont.—Hon. G. D. Robertson, Minister of Labor, expressed satisfaction at reductions in the prices of commodities, including breakfast foods, that had been effected recently as a result of representations made by the labor department. The probe being conducted by the department under the Combines Investigation Act into the price of bread is expected to be concluded shortly.

Victims Of Flood

Lisbon, Portugal.—An entire family was buried under the ruins of a home at Tondella, Portugal, which collapsed under the pressure of flood waters. The flood situation throughout Northern Portugal, already serious, was reported to be growing more menacing.

Professional men of Italy have agreed to reduce their fees.

Wheat Market Menace

Says Russia Can Supply the World With Wheat

Washington, D.C.—Chairman Fish of the special House Committee investigating the Russian wheat market in the House recently, the use of the United States farm machinery in Russia would do away with the world market for United States wheat.

Production of Russian wheat will be so greatly increased by the use of this machinery, he said, that Russia will be able to supply the world.

He asked the House to approve his resolution by which the Red Cross would distribute some of the wheat held by the Farm Board to the hungry. This, Fish added, would decrease the surplus in the United States and prevent a drop in the price.

FRANCE PAYS FINAL TRIBUTE TO WAR HERO

Paris, France.—France, in a final tribute of love and respect to the "Savior" of Paris, gave Marshal Joffre a national funeral which in its grandeur, reminded of that "Day of Ashes" when the body of Napoleon Bonaparte was brought back from St. Helena.

The body of the victor of the Marne lay, like that of Napoleon, under the great dome of the Invalides, in a disused sacristy of the Chapel of St. Louis, dedicated to the old crusader king. It was placed there so that Madame Joffre might pray beside her soldier husband in silence.

Some months from now the body will be transferred to "Chestnut Grove," the marshal's country home, where it will entomb in a mausoleum.

Church and state united to make the last rites of France's loved soldier a full expression of the Republic's gratitude and respect. The thousands of French people who filled the gray old cathedral of Notre Dame and the million or more who lined the route of the cortege from the cathedral to the Invalides testified abundantly the love that Paris bore for "Papa" Joffre.

There was not a foot of standing room at Notre Dame when the arrival of President Doumergue signalled the beginning of the Requiem Mass, shortened at Joffre's own request. The highest officials of the government were here in sombre garb and representatives of many nations, many of them attending as the personal representatives of rulers and sovereigns. Monsignor Joseph Marie Tesser, bishop of Schönbach, St.-Marine, read the absolution and gave the final blessing.

Outside in the square in front of the cathedral the cortege formed Republican Guardmen in the land. On either side of the coffin marched a company of infantry, and behind, after the marshal's immediate family, marched the president, members of the government, and the diplomatic corps.

An orderly led "Sorciere," the marshal's horse, caparisoned in black. There was intense silence as the cortege moved slowly up the Rue de Rivoli to the Place de la Concorde and the Grand Palace, where it turned and crossed the Alexander III. bridge to the Great Square in front of the Invalides. There Louis Barthou, Minister of War, paid the government's eulogy.

He hailed Joffre as a "saviour of world liberty" and said that he was there to "voice the unanimous gratitude of the nation."

After the funeral oration the marshal's body was borne solemnly to the sacristy where it will remain until the mausoleum at Louveciennes is ready.

Mourning for Marshal Joffre was expressed in all the theatres which remained open. Simultaneously in each, at 9 o'clock, an actor appeared on the stage and read the marshal's famous Marne battle order of the day in which he called on the French army to die rather than retreat. A minute's silence was asked, and as it ended the orchestra sounded Taps.

British Battle Fleet On Cruise
Portsmouth, England.—The British battleship "Nelson" has started on a cruise during which she will visit the United States fleet at Colon, Panama, February 23. The "Nelson," flying the flag of Admiral Sir Michael Hodgson, will lead a special squadron of seven new battleships and cruisers, the fleet Great Britain has ever sent to the West Indies. The squadron will visit each British possession there.

FIVE ITALIAN FLYERS KILLED IN TAKE-OFF

Bolama, Portuguese Guinea, Africa.—Five Italian aviators died and three others were injured at the start of the great aviation adventure which carried 10 seaplanes safely from this point on the West African coast to Brazil.

The Stefani News Agency, official Italian press service, said that two planes crashed shortly after the take-off.

Two others which were forced to land on the ocean, while General Italo Balbo, took the ten remaining ships safely into Italian naval vessels. The Stefani Agency said both were expected to be towed to Gerando Noronha, Brazilian penal island, not far from Natal.

This official announcement by the Stefani Agency clears up the confusion which has existed since Gen. Balbo and his ten ships skinned to rest at Natal after a speedy trip of 17 hours, 15 minutes yesterday. First reports said that 12 ships left Bolama with two of them landing at sea en route, but later despatches from various sources asserted that two had not been able to take off. The official report shows that 14—two of them were repair and replacement units not scheduled to make the trip originally—look off.

Of the two which met disaster, Captain Renango took up one from the water, but it dived sharply after reaching an altitude of only about 50 yards. The man killed, a sergeant-major acting as mechanic, was riding above the right pontoon, which was shoved upward and wrecked when the plane dropped to the surface. Captain Renango, another officer acting as co-pilot, and the radio operator, were injured.

The other unfortunate ship, commanded by Captain Boer, flew all right for about 10 minutes after the take-off, but suddenly was forced to land at full speed. So sharply did the heavy seaplane slip down upon the ocean, that fire broke out and burned to death the four occupants, Captain Boer, Lieutenant Barbinetti, Sergeant Mechanic Kems, and Radio Operator Barbinetti. The accidents were attributed to the extremely heavy loads carried.

Postpones Flight

Amy Johnson, British Girl Flyer, Will Await More Favorable Weather
Warsaw, Poland.—Amy Johnson, the British girl flyer, has postponed her flight to China until more favorable weather, which she does not expect to have before spring.

She will leave Warsaw by train for Moscow, where she expects to meet Soviet persons interested in her attempt and hopes to get full information necessary for her flight across the Ural Mountains and Siberia. She expects to return to Warsaw this week, by which time her plane, damaged when it was forced down at Amelin, near here, will have been repaired.

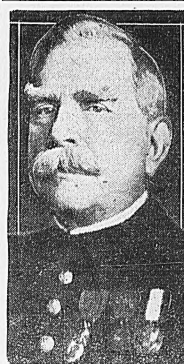

Deaths From Railway Accidents
Ottawa, Ont.—Thirty-four persons were killed and 242 injured during October, 1930, in railway accidents on Canadian lines, according to a return issued by the board of railway commissioners.

1930 All-Lines Champions

W. T. Warren (left), captain of the Toronto Freight Office First Aid Team of the Canadian Pacific Railway, showing receiving the Lord Shannon's Challenge Trophy from W. M. Neal, general manager of the railway's western lines. Toronto Freight Office won the coveted trophy when as winners of eastern lines championship they defeated the winners of the western lines championship, Weston Shops, at Winnipeg, in December. The Shannon's Trophy is emblematic of the Canadian Pacific All-Lines First Aid Championship and was won last year by the C. P. R. Police Team.

HERO OF THE MARNE

Marshal Joseph Cesar Joffre, noted hero of the first battle of the Marne, who died after a short illness in the hospital of St. Jean de Dieu in Paris.

Saskatchewan Village Has Disastrous Fire

Business Section Of Mayfair Is Practically In Ruins

Saskatoon, Sask.—The explosion of a lamp leaves the village of Mayfair, on the new Speers-Rabbit Lake branch, northwest of Saskatoon, with most of its business places in ruins. Before the fire could be checked two general stores, the Bank of Toronto building, and a Chinese restaurant were gutted. An early estimate sets the damage at around \$30,000.

David Cunningham was about to retire when the explosion of a lamp in his store quickly spread rapidly and despite desperate efforts of the villagers who worked a bucket brigade, F. W. Allen's store and post-office, the bank and restaurant were enveloped in flames. Without any equipment the villagers tore down an implement office and so stopped any further spread of flames.

Mayfair, which is 22 miles north of Speers, was established only two and a half years ago when the new branch line went through that territory.

Provinces Pay Five Per Cent.

Ottawa Assumes Bulk Of Cost Of Old Age Pensions

Winnipeg, Man.—The Dominion Government in future will pay 95 per cent. of the cost of old age pensions. It was revealed by John Bracken, premier of Manitoba.

Mr. Bracken in commenting on the western premiers' conference here with Prime Minister R. B. Bennett, disclosed that assurance had been given by Mr. Bennett that the provinces would be called upon to pay only 5 per cent. of the old age pensions charges as compared with the 50 per cent. now contributed.

'Plane Links Pacific Dominions

Wellington, N.Z.—Guy Menzies, young Sydney aviator, made the first light plane flight between Australia and New Zealand. He took Charles Kingsford-Smith's "Southern Cross II," over the 1,200 miles between Sydney and Westland in 13½ hours. He came down in a swamp near Ross, damaging the plane slightly.

Canada Scholarship Fund

Large Amount Being Subscribed To Bring British Graduates Here

Montreal.—Subscription of \$900,000 is now being made in Canada and England, to be known as the "Canada Scholarship Fund," to bring British public or secondary school graduates to Canada for their university education and subsequent entrance to Canadian life.

Canada's allotment of the fund is half of the total, most of which has already been pledged upon condition that a similar amount is raised in Great Britain, according to an announcement made today at McGill University.

E. W. Beatty, K.C., is the chairman of the Canadian committee which also comprises Sir Arthur Currie, principal and vice-chancellor of McGill University.

Brig.-Gen. V. W. Odlum, of Vancouver, and Dr. R. C. Wallace, president of the University of Alberta, are members of the committee.

A MEASURE OF HOME RULE FOR INDIA PROBABLE

London, England.—Hindus, Moslems and Europeans of India have joined in support of the scheme of home rule for India, which was laid before the round-table conference some days ago by Sir Tej Bahadur Sapru. The same plan, in its essentials, was accepted by Lord Reading on behalf of the British Liberal delegates, but was received by the British Conservative delegates coldly and non-committally.

Gavin Jones, president of the European Association of India, before the conference committee, described the present government of India as hopeless and humiliatingly weak. The country was drifting into chaos, he said. He could see no way out but to give a larger measure of responsibility to the Indian legislature.

Sir Bhupendra Mitra, one of India's leading financial experts, thought no greater safeguards should be imposed on the Indian government than were imposed on Canada when she was created a Dominion. Sir Bhupendra, indeed, termed the new administration "the Dominion government of India."

M. A. Jinnah, a prominent Moslem barrister, declared he was under no misapprehension that India was not going to get either Dominion status or full responsible government. He strongly argued, however, that some of the proposed safeguards were unnecessary.

"It is very commonly said in England," Jinnah added, "that we must either rule India or get out." Let me tell you, you can neither rule India nor get out. Are you going to meet the situation that has arisen in India or not? I say that it will indicate an utter lack of gravity, of British statesmanship if you do not meet the situation before you leave."

Jinnah criticized the attitude of Sir Samuel Hoare, the Conservative spokesman. "Sir Samuel said that he would take a non-committal attitude. That was the only contribution he could make to the discussion," he said.

The situation in India was thus summed up by Jinnah: "There is the position in India: One strong body stands for complete independence. Another solid body stands for Dominion status. Now we have come to you and we say: Are you going to agree to that measure of responsibility which will win over to your decisions the large bulk of these politically united people, so that they will say 'Now we have got something which is worth something now we have something substantial to work for?'"

Sir C. P. Aiyar also pleaded for responsible government, saying he believed the viceroy should have power to govern in case of a complete constitutional breakdown, but that the ordinary machinery should be left to handle the situation otherwise.

Sir Sultan Ahmed, Moslem barrister, expressed hopes that the British Conservatives in time would come to agree with Lord Reading, Liberal spokesman, in acceptance of the Sapru scheme of responsible government. He also declared the Indian response to Lord Reading's speech had been electric, and Bombay had been particularly pleased.

Warm tribute to Lord Willingdon, the newly-appointed viceroy, for his attitude while Governor of Madras some years ago, was paid by Sir C. P. Aiyar. He remarked that Lord Willingdon had taken all the ministers and the legislature into his confidence, and as a result had secured their willing co-operation.

WIDER TRADE WITH AUSTRALIA IS ANTICIPATED

Victoria, B.C.—Hon. Parker Moloney, minister of markets and transportation for Australia, said he would recommend the Australian cabinet to "go the limit" in diverting to Canada trade which was going to foreign countries and which could come to this dominion, in an address here recently.

Mr. Moloney said he was leaving Canada with the highest hopes and expectations for the negotiations he had conducted at Ottawa.

"What we have done at Ottawa will, in my opinion, culminate in a trade treaty which will be of lasting benefit to both dominions," he said. "I believe what we have done at Ottawa will have a great psychological effect upon the nations in the conference in Ottawa," he added. "Many others will want to fall in line with us."

Mr. Moloney attended a memorial service held in the cathedral here for Marshal Joffre.

He called upon the provincial government, and while no announcement was made, it was understood the conference was satisfactory. British Columbia's desire for a lumber preference was believed to have been discussed. Mr. Moloney also continued conferences with Okanagan Fruit Growers, who hope to build up a market in Australia for British Columbia fruit products.

The Australian minister left for home on the R.M.S. Aorangi.

Demonstration Train

Agriculture College Facilities Being Carried To Farmers Over C.P.R. Lines

Winnipeg, Man.—With a view to carrying a college of agriculture facilities to the farmers of North Eastern Saskatchewan, the Canadian Pacific Railway in conjunction with the extension department of the college of agriculture, University of Saskatchewan, is supplying, equipping and moving demonstration and lecture cars especially dealing with poultry and dairying.

Under the suggestion of W. H. Boyle and C. E. Thomas of the University of Saskatchewan and three lecturers, the train left Saskatoon early Tuesday, January sixth, for the first meeting at Ristow, the same day. The train consists of demonstration and lecture cars, the former containing materials for demonstrative purposes for agriculturists interested in poultry and dairying. No livestock or seed is being carried for sale.

A wide range of topics will be discussed, care of poultry, best housing methods, killing and market preparation, and in the dairy section, care and feeding of milch cows, making a cow pay her store milk, testing cows and handling milk and cream.

The train will tour the whole of North Eastern Saskatchewan served by Canadian Pacific trackage and will travel as far east as Brandon and leaving there January 13, will journey via Goudie as far north as Wipaway. Leaving Wipaway January 25th, the train returns to Langigan via Leslie, Wynyard and Dafoe February 4. Leaving Langigan February 6th, the tour leads as far as Groulx, February 13, returning to Gowan February 17th, and travelling south via Duval, Strasburg, Bulyea, Balcarres, Neudorf, March 6, to Stockholm, thence back via Imperial and Renown, concluding the tour at Young, March 19th.

Canadian Is Chosen

New York, N.Y.—Position occupied by Canada in the development of radio communication was recognized here in the election of Commander C. P. Edwards, Canadian director of radio, as vice-president of the Institute of radio engineers. The institute is an international organization with 6,000 members.

Had Interesting Career

Toronto, Ontario.—An interesting career that included service in the metropolitan police, London, England, at one time personal body-guard to the King and for the past 25 years a guardian of a local financial institution, is recalled by the retirement of George Cuddy, at the age of 84.

London Service For Joffre

London, Eng.—Cardinal Bourne, archbishop of Westminster, officiated at a requiem mass for Marshal Joffre, at the same time services were being held for the marshal in Paris. Representatives of the Prince of Wales, the Duke of Connaught and other distinguished personages attended.

CHAPTER VIII.—Continued.

"Come," he said at last, "take down those hands or I'll do it for you. Sit down, Angela. If you're really suffering, I'm sorry, but you're a good actress, and you've cheated me too many times. I never mention the Ashleys unless you drive me to it, or—or as a warning. Good for you, I think I want to remember."

She sank onto a divan, and her arms relaxed. Her husband moved nearer.

"You told me," he said, "that if you had a garden—something to work over—you'd be safe. You were right. I'm sorry. You probably believed it. But I can see now that the garden is only a pose. It doesn't absorb you any more than does your painting—or your singing, at which you might do something worth while. Nothing has ever absorbed you but the pursuit of me. If you had a child—"

She looked at him, and her lip curled.

"Didn't you once say that I was not fit to be a mother?"

"You're not; but—"

Her eyes blazed.

"I suppose you'd like to see me turn into a dowl, like that stupid little moron next door. Two babies in four years! I call it incest. I don't believe she's seen her back hair in a mirror since the first one came. I doubt if she's had a new gown since the last. I dare say she'll have a third before she has time to see a dress-maker. That sort always does. She's stupid—too stupid to know her own husband—too stupid to see that a man won't stand her untidy ways. Why, by lifting a finger I could have Nick Hastings eating out of my hand!"

"Take care then, that you don't lift it; but I'm not so sure. I thought you lifted more than a finger the other night, and as I told you then—it didn't work."

Angela laughed bitterly.

"Well, I'll show you that it will work."

"You will not! Do you understand? I don't ask you to promise, because I know you don't keep your promises; but I shall watch, and you, know, Angela, things don't escape me."

He moved toward the door as if the interview were at an end; then paused, looking back at the blue figure on the divan. Angela's shoulders had drooped in an attitude of such wear-

ness as she seldom allowed herself. Even her eyes looked tired; and at the sight something hovered wistfully across her husband's face—an elusive thing that seldom came there, wiping away the cynicism, leaving in its place a glimpse of something better that fought unhappily for life. He turned, and going to her side, laid his hand gently on her arm.

"My dear—I don't mean to be unkind. Deep in your heart you know that I have never been unkind—don't you? More than anything in the world, Angela, I desire your happiness. There is nothing I would not do for you, if—if you could be satisfied with me—alone."

"You!"

She sprang up, shaking off his hand as if it scorched her.

"You!"

She laughed, scornfully, and sweeping past him without a glance, ran up the stairs.

For a moment James Halliday stood where she had left him. It was not until the sound of her feet was silenced, that he sighed, wearily, like a man who has fought and lost. Then, catching sight of himself in a long mirror, he straightened up, and his lips took on their familiar, unpleasant curve. There was no trace left of the thing that had lighted his face a moment since; and with a shrug that might have been Angela's very own, he went back to his study and the day's work.

CHAPTER IX.

Gay had been gone a month, a month that had brought color to her cheeks and rest to her eyes. She was right in thinking that married life couldn't live under the same roof with Uncle Sim. His unfeeling kindness—his faith in God and his fellow men, was something before which doubt and suspicion faded away. And the Sundays with Nick had been like a repetition of their honeymoon. One never-to-be-forgotten day they left the babies with Uncle Sim and his housekeeper, and tramped off together, as care-free as two children out of school.

"You just leave your responsibilities with Miss Bemis and me, and forget all about 'em for a spell," said Uncle Sim. "You'll be all the gladder to pick 'em up again when you get back."

"You bet we will!" said Nick, lifting his youngest responsibility for a kiss. "Come on, Gay. Miss Bemis knew the ins and outs of infant feeding before you were born. You needn't advise her any further."

"That's right," said Simson. "Run along now and don't keep Nick waiting. I shan't look for you till the cows come home. Gorry! you don't neither o' you look old enough to have two babies!"

"We don't feel old enough—today,"

laughed Gay, as they turned away. Simson, Sonny on his knee, watched them lovingly till they turned the corner.

"It's a good thing to be young," he murmured dreamily, "but it ain't bad being old, neither, so long as you've got something young around you. Don't hardly know what I'll do when Gay takes these babies back to Bakerville. Wish-my old woman could see 'em. Maybe she does. Like as not she knows just how I'm settin' here with Sonny on my knee. Well, little boy, you want to feed the chickens?"

"Yep," answered Sonny eagerly, and slipping off Simson's knee, went straight for the umbrella, much to the admiration of his adopted uncle.

As for Gay and Nick, they forgot their cares with amazing ease. They climbed Bear Hill, the nearest approach to a mountain that the vicinity possessed, and later, in the cool of the forest shade, they waded a brook, while Nick built a dam; the task that getting married had interrupted four years before.

It was Gay who reminded him of that long-gone interruption. She sat on a convenient rock, her feet in the water, and watched him work.

"I hated to keep you from building the dam that day, Nick," she said regretfully. "It seemed wicked that you shouldn't do everything that came into your head; but I thought you'd forgotten what was before us, and I was anxious, even while it worried me to stop your fun. He worried me all the way to State Line."

"Idiot!" said Nick, pausing in his absorbing task to throw her a smile of understanding. He worked silently for a while, then stopped to survey the finished product of his labor.

"See, my dear! I ought to have been a civil engineer. Always wanted to, and I bet you, Gay, I'd have made a good one; but uncle wouldn't consider it for a minute."

He came nearer, and sat beside her on the rock.

"Say!" he exclaimed boyishly, "isn't it great being off here together? How cunning your feet look in the water!"

"Cunning!" laughed Gay. "I'd hardly call them that; though beside yours they do look—well, smaller than usual."

"They're small enough; and they haven't been spoiled by the spurs heels our fair neighbor persists in wearing. I wonder what she'd think, Gay, if she could see us now!"

Sudden color flooded Gay's face, and she drew one foot up out of sight.

"You mean Mrs. Halliday? Why, I—"

I suppose she'd think it was—impossible."

Nick shook with laughter.

"Gay, you're the funniest kid. I bet just remembering Mrs. Halliday and her fastidiousness, made you feel ashamed. Put that foot back. There are no fussy city people around, and I like you just as you are. I wouldn't give a red cent for a wife who wasn't a gal as well. Say, sweetheart, let's bring Sonny up here some day to see this dam."

"I thought you were ordered to forget your responsibilities," Gay answered, as he foot slipped back into the cool stream.

"I don't regard Sonny as a responsibility—today, anyway. He's a good little chum, just as you are. Do you know, dear, sometimes it comes over me how bleak life would be without you all. Just suppose I hadn't gone over to say good-bye to you that morning!"

Gay looked at him, her eyes brimming with tenderness.

"And you so nearly forgot me, darling."

Nick stared. He had never told her how true that was. Even now, as she felt an arm across his shoulders, he still shrank at the memory.

"Did you think for a minute that I didn't know?" she questioned gently. "I was in the garden when I saw you come out with that stick and bundle. Could I have misunderstood, after the times we'd planned your going? And when you turned away something—something went dead in my heart. Nick, it seemed so terrible that you could go like that—without a word—without even a thought of me, when I loved you more than anything in the whole world!"

"You—loved me!"

She smiled at his amazement.

(To Be Continued.)

Build Bridge At Winnipeg
The cities of Winnipeg and St. Boniface have finally approved plans for the rebuilding of Norwood bridge which connects the two cities over the Red River. The bridge will be of steel and, including fabrication and construction, will provide work for about 600 men throughout the winter.

In Honor Of Amundsen

Firing of a 200,000 candle-power aerolite rocket from the summit of Pike's Peak in memory of the late Roald Amundsen, famous explorer, is the salute for 1931 by the Ad-an-ang Club, mountain-scaling organization, of which Amundsen was a member.

PILE PAIN
Ends Right Away
"The very first time I used 'South-Sea' I was cured of my piles. It is a great relief. Stopped swelling and itching. Quickest relief known. All druggists."

More Than Local Problem

Flight Of Western Farmer Matter Of National Concern

If the farmers of the west have made a mistake in depending too largely on wheat growing a change must be made. But mixed farming cannot be adopted at a moment's notice. In the meantime the inability of the west to sell its wheat surplus is more than a local problem. It is a matter of national concern that affects the prosperity of the east only in lesser degree to that of the west itself.

E. W. Beatty, president of the C.P.R., was right when he said that some form of temporary assistance must be worked out. The lack of buying power of the western farmers has a direct effect on economic conditions in the eastern provinces. The problem is not one that can be dismissed as a purely sectional matter in which the east has no concern.

The only question to be decided is as to the best and most effective method of assistance, and that question must be settled by co-operation between the Federal Government and the provincial governments of Manitoba, Saskatchewan and Alberta.—Toronto Telegram.

Recipes For This Week

(By Betty Barclay)

BREAD PUDDING DE LUXE

- 2 cups milk, scalded.
- 2 tablespoons butter.
- 1 cup stale bread, cut into ½ inch cubes.
- ¼ cup sugar.
- ¼ teaspoon salt.
- ¼ teaspoon vanilla.
- ¼ teaspoon almond extract.
- 2 eggs, slightly beaten.

1 cup coconut, toasted.

Combine milk with butter and bread cubes. Add salt, sugar and flavoring to eggs and beat slightly. Pour milk mixture over egg mixture and pour in coconut. Pour into greased baking dish, place in pan of hot water, and bake in moderate oven (350 degrees Fahrenheit), 45 to 60 minutes. Serve 6.

COCONUT SALAD DELICIOUS

- 2 cups cabbage, finely shredded.
- 1 cup grated pineapple, drained.
- 1 cup shredded coconut.
- ¼ cup mayonnaise.

Dash of salt.

Crisp cabbage by allowing it to stand in ice water. Drain and dry thoroughly. Toss lightly together with remaining ingredients. Serve on crisp lettuce. Garnish with strips of pimiento. Serves 6.

India's Greatest Surgeon

Though Retired As A Missionary Sir William Wanless Is Still Working

The many Canadian friends of Sir William Wanless, Kt., M.D., F.A.C.S., will be interested in the fact that, though retired as a Canadian missionary of the American Presbyterian Church he has returned to India in connection with the launching of the "Sir William Wanless Union Tuberculosis Sanatorium," located on a one-hundred-acre property two miles from Miraj in Western India where the distinguished missionary surgeon spent his life and became noted as probably the most skillful surgeon in all India. It is stated that Sir William throughout his missionary career performed not fewer than ninety-six thousand operations on all classes of people of India. Canada may well be proud of the contribution she has made to the welfare of peoples in other lands through the services of such distinguished missionaries as Sir William Wanless, President O. R. Avison, Dr. James S. Gale, and others.

Douglas' Egyptian Liniment, always quick, always certain. Stops bleeding instantly. Cauterizes wounds and prevents blood poisoning. Splendid for muscular rheumatism.

Wheat Most Valuable Feed

Which is the most valuable as a feed for livestock or as a human food? The place filled by these two feeds is not precisely the same it is being estimated at the present time that if corn is at one dollar a bushel it would be more economical to buy wheat at a dollar and twelve cents a bushel, indicating that wheat is slightly the more valuable of the two.

London boy bandits are being birched.

Taxis On Credit

Your Name and Address Satisfy Bombay Drivers

Taxis can always be hired on credit in Bombay, reports a traveller. If you have no money with you, you simply give your name and address to the driver and he calls round at your house the next day—or oftener than not he doesn't bother to do so till some weeks afterwards, to such an extent does the native taximan trust the British sahib. Once in Bombay an Englishman hired a taxi to drive him to the docks. He went on board a liner and told the taxi-driver to wait while he said goodbye to a friend. But the liner sailed with him. The driver was so convinced of the honesty of his fare that he refused to budge till he came back. He sat steadfastly on the quayside for two and one-half days before the police could persuade him that the sahib was well on his way to England. Even then he had to use force to get him go. By that time the fare on the meter was about 160 rupees!

Will Use Canadian Materials

City Of Saskatoon Will Insert Special Clause In All Contracts

Acting on a recommendation from the Department of Trade and Commerce, the City of Saskatoon will in future include a special clause in all contracts providing that materials used shall be Canadian products where possible. Permission to use foreign materials will be granted only where sufficient cause is shown.

Crying Babies Are Sickly Babies

The well child does not cry. He is laughing and happy all the time. Baby's cry of distress is the only means he has of telling the mother or nurse he is ill. Mothers, you can keep your little ones well and happy by giving them Baby's Own Tablets—the safe and efficient remedy for all childhood ailments.

Baby's Own Tablets are a mild but thorough laxative. They sweeten the stomach, regulate the bowels and thus banish constipation and indigestion; break up colds and simple fevers and allay the irritation accompanying the cutting of teeth. They are sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Made a Guess At It

Conan Doyle has said that the worst handwriting he ever encountered belonged to James Payn, novelist and some time editor of "Cornhill" magazine. So bad was it, swears Doyle, that some one who could not read a note he got from Payn, took it to a chemist thinking that he—as an expert in deciphering prescriptions—might be able to read it. After contemplating it for awhile the chemist disappeared, and later emerged with a large bottle of medicine.

No child should be allowed to suffer an hour from worms when prompt relief can be got in a simple but strong remedy—Mother Graves' Worm Expeller.

Two pulman cars designed for transportation of sick and invalid persons have been built for use on a northern railroad.

France is covered with notes written by Napoleon and contains the outline of his proposed attack. Prince Roland Bonaparte, descendant of the Emperor, presented the map to the society.

Had Eye On Australia

A curious map, now in the possession of the French Geographical Society, reveals upon Napoleon Bonaparte's plans to invade Australia and annex it to France. The map is covered with notes written by Napoleon and contains the outline of his proposed attack. Prince Roland Bonaparte, descendant of the Emperor, presented the map to the society.

Curious map, now in the possession of the French Geographical Society, reveals upon Napoleon Bonaparte's plans to invade Australia and annex it to France. The map is covered with notes written by Napoleon and contains the outline of his proposed attack. Prince Roland Bonaparte, descendant of the Emperor, presented the map to the society.

CHILDREN CRY FOR IT—

CHILDREN hate to take medicines as a rule, but every child loves the taste of Castoria. And this pure vegetable preparation is just as good as it tastes; just as bland and just as harmless as the recipe reads.

When Baby's cry warns of colic, a few drops of Castoria has him soothed, asleep again in a jiffy. Nothing is more valuable in diarrhea. When coated tongue or bad breath tell of constipation, invoke its gentle aid to cleanse and regulate a child's bowels. In colds or children's diseases, you should use it to keep the system from clogging.

Castoria is sold in every drugstore; the genuine always bears Chas. H. Fletcher's signature.

CASTORIA**

Little Helps For This Week

"I must work the works of Him that sent me, while it is day; the night cometh when no man can work."—John ix. 4.

Rest not content in thy darkness, a cloud;
Work for some good, be it ever so slowly;
Cherish some flower, be it ever so lowly;
Labor!—all labor is noble and holy;
Let thy great deeds be thy prayer to thy God.

—Frances S. Osagood.

Remember now and always that life is no idle dream, but a solemn reality, based upon eternity and encompassed by eternity. Find out your task, stand to it; for the night cometh, when no man can carry.

—Thomas Carlyle.

Persian Balm the creator and preserver of beautiful complexions. Tonic in effect and wonderfully stimulating. Safeguards and beautifies the most delicately-textured skins. Cools and relieves all skins flushed or irritated by weather conditions. Magical in results. A little gentle rubbing and a youthful freshness and daintiness is instantly created. Invaluable for softening the hands and making them flawlessly white. Truly the perfect toilet requisite for the woman who cares.

Had Eye On Australia

A curious map, now in the possession of the French Geographical Society, reveals upon Napoleon Bonaparte's plans to invade Australia and annex it to France. The map is covered with notes written by Napoleon and contains the outline of his proposed attack. Prince Roland Bonaparte, descendant of the Emperor, presented the map to the society.

**GAS
relieved**

WHAT most people call indigestion is usually excess acid in the stomach. Food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude helps. Use what your doctor would advise.

The best help is Phillips' Milk of Magnesia. For the 50 years since its invention, it has combined standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

neutralizes many times its volume in acid. The results are immediate with no harmful after-effects.

Once you learn this perfect way you'll never deal in any other manner with the headaches, gas, bloating, nausea, dizziness, indigestion, biliousness, etc., due to an over-acid stomach and bowels.

Be sure to get genuine Phillips'. It is always a liquid; never made in tablet form. Look for the name Phillips on the bottle. All druggists sell it—50c.

The Chinook Advance

Published by Mrs. M. C. Nicholson every Thursday afternoon from The Advance Building, Main Street, Chinook, Alberta, and entered in the postoffice as second class matter. All letters addressed to the editor for insertion in The Advance, must be signed to show bona fides of the writer. Publication in all cases is subject to the judgment of the publisher. We do not necessarily coincide with views expressed.

The subscription rates to The Advance are \$1.50 per annum in Canada and \$2.00 outside of Canada. The transient advertising rates in The Advance are—display, 40c per inch for first week and 30c for each succeeding week, providing no change is made. For heavy composition an extra charge is made for first week. Reading notices, 10c per count line. Legal advertising, 15c per count line for first week and 10c for each succeeding week. Cards of thanks, \$1.00.

The Advance is a member of the Canadian Weekly Newspapers Association and the Alberta Weekly Newspapers Association, and observes the prices and conditions of these organizations.

Heard Around Town

Miss Marvel Milligan left Thursday morning for Calgary.

Miss Mary Green, of Sedalia, was a business visitor in Chinook on Thursday.

Mr. and Mrs. O. D. Harrington were guests at the home of A. V. Brodine Saturday afternoon.

Mr. and Mrs. C. E. Neff went to Calgary on Friday last on a business visit, returning Tuesday.

Mrs. Lloyd Robinson, who has been visiting with relatives at Brayton, Iowa, for the past month, returned Thursday morning.

Mr. and Mrs. J. G. Connell, of the Acadia Hotel, who have been enjoying a very pleasant three weeks' vacation at Edmonton, Vancouver and Victoria, returned home Tuesday morning.

The regular meeting of the Ladies' Card Club was held this week at the home of Mrs. Thompson. Honors went to Mrs. J. Massey. Next week the club will meet at the home of Mrs. S. H. Smith.

The annual Burns' Night Concert, under the auspices of the Chinook and District Agricultural Society, will be held in the school on Friday evening, January 30 commencing at 8 o'clock. A good programme of vocal and instrumental music will be presented. A dance will follow the program.

Two Chinook High School students have wonderful high school career. Miss Doris Marcy and V. C. Rideout have received their diploma for their high school work. Miss Marcy averaged 85.6% on 21 units of Grades IX, X and XI, and V. C. Rideout averaged 83.7% on 22 units. These averages have never been beaten by any student attending the Chinook school. In fact these averages are among the few of the highest obtained in the province.

Peyton Pickings

A most enjoyable time was had at the home of Mrs. W. Shier last Wednesday evening, when she entertained at four tables of Court Whist. The winners were, ladies' first prize, Mrs. A. Bjornsrud; consolation, Miss Ida Marcy; Gent's first prize, Ole Rudy; consolation, Morris Broston.

Mr. and Mrs. J. E. Gaughey, of Calgary, have been visiting friends in the Big Spring district, where they formerly lived.

Mr. and Mrs. A. Bjornsrud and Miss Ida Marcy spent Sunday last with the Brostons at Colliholme.

Mrs. Wm. Niel, teacher of Myrtle school, spent the week end with Mrs. F. W. Hobson.

Jay and Ray Robison and daughters visited last Sunday at the Geo Thompson home.

Mr. and Mrs. W. Anderson and

Evelyn Maxine and Mr. and Mrs. Joe Hess were guests at the home of Mr. and Mrs. W. Shier last Sunday.

A number of the Big Spring people attended the U.F.A. dance at Clover Leaf last Friday. There was a fair attendance, and all report a real good time.

Presentation To Lady Willingdon

On the termination of the Governor General of Canada's term of office it has been customary for the women of Canada to present to the departing Lady of Rideau Hall some fitting memento of her life among us.

No doubt, the desire to do this will be particularly strong in the case of Lady Willingdon, who has shown such sincere interest in the women of Canada and who is personally known to so many Canadian women, even in the most remote parts of our province.

With this in view a committee has been formed in Ottawa, under the direction of Miss Mildred Bennett, with Lady Borden as treasurer.

Mrs. Egbert and Mrs. Brownlee have been asked to take charge of the collection of the fund in this province. They realize that, owing to conditions, women may not be able to contribute what they would wish, but would like to emphasize that any small amount will show a kindly spirit and interest and will be appreciated.

Will you please send subscriptions to reach Government House, Edmonton, not later than January 20th and payable to either Mrs. Egbert or Mrs. Brownlee. Acknowledgement of all subscriptions will be forwarded from Government House, Edmonton, and a full list of contributions will be sent the National Committee. Remittances should be made by marked cheque or money order.

Here and There

(Continued from page 1) In answer to the demands of rapidly increasing travel between Montreal and Boston, the "Red Wing", fast running Canadian Pacific night express between the two cities will have forty minutes cut from its schedule on and after January 11, leaving Montreal, forty minutes later than before but arriving at Boston at the same time as on the former schedule. The train will leave the Windsor station, Montreal, at 8.55 instead of 9.15 as heretofore. The "Red Wing" is an all-steel train with all equipment of the latest type.

Appointment of W. R. Patterson to be deputy general auditor, Canadian Pacific Railway, is announced by E. E. Lloyd, Controller of the railway. He is succeeded in his late position of auditor of disbursements by Charles R. Gordon. Mr. Patterson is one of the younger men holding important offices in the Canadian Pacific Railway, having been appointed auditor of disbursements four years ago at the age of 36. Mr. Gordon was controller of the Kettle Valley Railway in British Columbia, prior to his new appointment.

A motor cycle and side car carrying two men and towing a man on skis, broke the silence of Lake Louise December 28 when at nearly 6,000 feet altitude it roared around an improvised track at a speed above 50 miles an hour. It was the first time in history that a motor cycle has been on Lake Louise; the first motor cycle ski-joring that has taken place there and the first time a motor cycle has travelled under its own power from the Prairies to Lake Louise in the depth of winter.

On the stroke of midnight of December 31st, last one of the most remarkable railroad careers in the Maritime Provinces ended with the retirement of Charles H. S. Henderson, dean of Canadian Pacific Railway conductors. Mr. Henderson became a train conductor in 1878, at the age of 17 on the New Brunswick railway between St. Stephen and Edmundston. He completed 51 years of service with this railway and the C. P. R. December 31. He has been conductor on the trains of three successive presidents of the Canadian Pacific.

Your Health

Now that the milestone of the New Year has passed, the order of the day is the keeping of the good resolutions which a time-honored custom holds for many of us. There is one good resolution on which more than any other depends the happiness of the entire family, and which is within the power of everyone to keep. It is the resolve to live more closely according to the simple laws which govern perfect health. Once get the habit when the children are small, and these valuable health rules will become second nature, to be observed unconsciously. As life proceeds we get an increasing value on the worth of good health and see in the golden hours of youth and early infancy the ideal time for the forming of life-long habits.

Mothers find it sometimes difficult to inspire children with the desire to keep clean their ears and neck, to say nothing about their teeth, but by keeping what is known as the health game with the accompanying record, many a youngster has unconsciously developed a cleanliness complex which affords his entire family a deal of satisfaction. The Junior Red Cross offers a splendid system of daily hygiene to all its members. The simple rules are printed on a chart. By means of a record which the child himself marks as a point of honor daily, the little duties are observed.

As one parent said to the writer "I was distracted with my family, they were so tiresome about the little details of personal cleanliness. When the new teacher introduced the Junior Red Cross into the school, there was the greatest difference in the world. They actually competed as to who would be the best groomed in the morning, and now it is a pleasure to see them."

If you desire a Health Game record with a Health Rule card, write to the Junior Red Cross, 407 Civic Block, Edmonton, and then use influence with your local teacher to have a Junior Red Cross branch in your school.

A TRIBUTE TO THE ART OF SKILFUL BREWING

- IF YOU LIKE A BEVERAGE WITH SNAP AND SPARKLE
- IF YOU LIKE A BEVERAGE OF MELLOW SMOOTHNESS
- IF YOU LIKE A BEVERAGE OF CREAMY DELICIOUSNESS
